

## **⚠️ Dust Condition Continues Over Freetown (05/03/2026)**

**🕒 Urgency:** Immediate      **⚠️ Severity:** Minor  
**📍 Certainty:** Observed

**Issued:**  
Thu 05 Mar 2026  
16:09

**Effective:**  
Thu 05 Mar 2026  
16:06

**Expires:**  
Fri 06 Mar 2026  
16:06

**Area:**  
Western Area Urban and Western  
Area Rural

### **Description:**

Light Dust continues to be present in the atmosphere causing slight reduction in visibility. Airborne dust levels are generally low and unlikely to significantly affect daily activities. The event is localized and poses minimal health or transport hazards.

### **Instruction:**

Sensitive individuals (with respiratory issues) may consider limiting outdoor activities or use face masks when they are outdoors. As visibility will be slightly reduced drivers and marine transporters are advised to drive and navigate with caution.
